Subject: RE: Human Health Criteria TWG- Gap Analysis Comments

I think Lon was following up on that piece, but I know he's out of the office this week, so he'll have to respond when he's back.

It's looking good for my attendance at a fall meeting in Anchorage. I know Lon was looking into funding, but I'm not sure if that was ever resolved.

Things are very busy with WA and ID right now!

Thx Matt. We will keep plugging along then.

One loose end was heading from Dr Gobas about how we might want to address the consumption of marine mammals as that food source wasn't addressed in his food web work for EPA. I was under the impression that Lon was following up on that.

Please give me a heads up if you hear of something I should make our leadership aware of. I suspect that you're fairly busy with the WA rulemaking...

Also- If there is consideration about attending the Fall mtg in Anchorage, we'd love to have (both) you and Lon.

Thanks,

Brock Tabor

Hi Brock,

I have a minor suggestion as I think what you have here is a pretty comprehensive list of questions for most of the inputs into the human health criteria equation. I think it might be useful to have a placeholder for the remaining inputs that aren't captured – toxicity factors (RfDs and CSFs), BW, DW, even if you are likely going to use EPA's 304(a) recommendations for those. Just a thought.

Thanks,

Matthew Szelag | Water Quality Standards Coordinator

Dear members and technical advisors of the DEC Human Health Criteria TWG,

Just a subtle reminder to those of you who have not submitted your comments to DEC on the Gap Analysis (enclosed) that Alison Kelley developed. Your feedback is very important to the DEC process and we would like to be able to incorporate all of your comments into a larger analysis of the process to date. It would be great if I could have your responses by **July 1** so that I can consolidate them accordingly.

Thank you for your time.
